INTRODUCTION

Central Department of Management (CDM) has long recognized educational importance at the home and abroad. Accordingly, since its establishment it has been striving to meet the demands of rigorous academic excellence in management education. In addition, it has been adding accolades to its credits with more than five decades of successful advancement towards the achievement of excellence in management education. In accordance of the present demand of the time CDM is thriving academically with its alumnus working in the reputed positions nationally & internationally and accredits itself as a center of excellence.

MASTER OF BUSINESS ADMINISTRATION IN FINANCE (MBA-F)

The Master of Business Administration in Finance (MBA-F) program seeks to develop professional skills in students particularly needed to successfully manage banking, insurance and other financial institutions tremendously growing and expanding all over the world due to economic liberalization, globalization and digitalization technology. This program strives both to deepen knowledge in applied finance and develop analysis skills by using technology relevant for financial management and analysis careers.

The graduates will be prepared for leadership positions in financial institutions and other businesses, heading finance department in organizations and becoming financial analysts and consultants. They obtain competencies required for managing business organizations successfully. Students will undertake research projects in the financial management area, which will inculcate in them the skills to solve financial and management problems alongside the core academic curriculum. The program is designed to equip students with the insights, analytical capabilities and skills to meet the challenges facing business leaders, financial managers and financial analysts and consultants, who seek to shape their organizations in today's cutting-age technology-based world, focusing on managing oneself and others, and increasing employee well-being and performance while working in dynamic and complex environments.

Program Objectives

1. Prepare dedicated business leaders for the development of the Nepalese financial sector with global perspectives.
2. Produce financial managers and leaders with people skills who can successfully manage and control the treasury of business organizations with great efficiency.
3. Develop self-motivated and competent financial analysts and consultants, equipped with capacity to launch their own sustainable financial services firms.
4. Build skillful manpower with financial problem solving and analyzing capabilities.
